

Liquid Level Indicator for IBC's and Drums

plastics technology

Capacitive Liquid level indicator, applicable for 200L Plastic drums, Rikutec IBC, Schütz IBC 1000 liter and Promens Varibox.

Properties:

- Completely made of plastic; free from metal parts
- Capacitive sensor to measure filling level
- Measurement without contact to chemical
- No risk of contamination
- Continuously adjustable height of sensor
- Up to 5 sensors at one fixture
- Fast mounting without tools

Level – Sensors for Fluid Level Measurement

- Probes with 2 meter electrical wire
- Measures through plastic barriers
- Recognition of aqueous and electrical conductive fluids
- Cost reduction by adjustment free installation

Container	Stand support	Probe with fixture
Plastic drum 200 Liter	E22000	E22002
IBC Rikutec	E22001	E22002
IBC 1000 litre Schütz	E22003	E22002

Additional fixture types for IBC containers in development.

The sensor is suitable for coloured walls also.

Probe with fixture

Fixed sensor

Base for plastic drum 200 litre

Promens Varibox FC 1000

Schütz IBC
